

As one of the owners of the public airwaves, I demand that you pay attention to the public outcry over what you are doing with our airwaves and do not proceed until there are public hearings on tv that the whole nation can watch. The issue needs more discussion before you make this big step. We do not want large media companies to own tv and radio stations and newspapers in the same cities...we want a free press. Do not freeze us out ...we are watching you. And just out curiosity, what were Michael Powell's credentials that qualified him to be the head of the FCC?...I just found out he is Colin Powell's son...I hope that is not it.!
